(54) Title: MODULATION OF COFFEE FLAVOUR PRECURSOR LEVELS IN GREEN COFFEE GRAINS

(57) Abstract: The present invention relates to isolated polynucleotides encoding cysteine proteinases; cysteine proteinase in-
hibitors; and aspartic endoproteinases. The invention also relates to a transformed host cell, preferably a plant cell, in which over- or
under- expression of these polynucleotides result in altered levels of coffee flavour precursor levels, specifically, amino group-con-
taining molecules such as amino acids, peptides and proteins, in green coffee grains.
